

Doctorate Program in Taxation Performance Fact Sheet

Students completing within the published program length of 3^(*) years (100% completion rate):

Calendar Year	# of Students who began program	# of Students available for graduation	100% Graduates	Completion Rate
2012	3	3	1	33%
2013	6	6	1	16%
2014	11	8	1	13%

Students completing after published program length of 4.5^(*) years (150% completion rate):

Calendar Year	# of Students who began program	# of Students available for graduation	150% Graduates	Completion Rate
2012	3	3	3	100%
2013	6	6	4	67%
2014	11	8	7	88%

Placement rates for those students who reported working information:

- *Not applicable (the school does not provide or promote placement services)*

License exam passage rates:

- *Not applicable (school studies do not lead to the taking of any professional license exam)*

Loan default rates, percentage of students receiving federal student loans:

- *Not applicable (the school does not accept, or participate in, federal student financial aid funds)*

Typical occupations obtained and wages earned by graduates:

- *Not applicable (the school only admits already working professionals, typically self-employed, and does not request wage/salary data). However, because the vast majority of our students are CPAs, we have obtained wage information from the AICPA website, which recommends glassdoor.com. Factoring out the highest and lowest, wages ranged from \$94k to \$126k for experience tax managers (CPAs with a relevant masters degree and at least 8 years experience). This information was re-confirmed on February 7, 2013.*

Total Program Cost: \$12,000 (plus a \$2,300 dissertation panel fee)
 Books & Supplies (est.): \$400 (average for "new"; books are not available through the school)
 Median Loan Debt: \$12,000 (plus 1--time finance fee of 2.63 for 36 months, or 5.26% for 48 months)

Based upon student feedback, students are earning an average of:

- *Not applicable (we do not collect this information from students, who are all working and mostly self-employed).*

Notes on data above:

- The completion rates for 2014 reflect students that enrolled in 2011, the rates for 2013 reflect students that enrolled in 2010, and completion rates for 2012 reflect students that enrolled in 2009. Because our program is both a "self-paced" program and one in which students may enroll at any time during the year, students start and finish at times that are most convenient to them. Some will graduate before the 3-year program ends, or they can request additional time if their work/personal lives interfere with their original completion.
- From 2007 through 2009, when the program period started for the '10, '11 & '12 graduates, the average program cost was \$7,500. In 2012, the doctoral program underwent several additional changes, to include extending the program length to 4 years, increasing the requirements for admission, graduation, as well as tuition to \$12,000.
- (*) Because the current program has undergone changes from those that graduated in the chart above, the chart won't reflect graduation rates of 2012 enrollees until 2016.

This fact sheet is filed with the California Bureau for Postsecondary Education. Regardless of any information you may have relating to completion rates, working rates, starting salaries or license exam passage rates, this fact sheet contains the information as calculated pursuant to state law.

Any questions a student may have regarding this fact sheet that have not been satisfactorily answered by the institution may be directed to:
